Leading SAFe (SAFe Agilist)

Leading SAFe® certification is amongst the most widespread and comprehensive approaches for large-scale Agile projects. It provides an accurate, reliable, and uniform method of evaluating SAFe skills, knowledge, and mindset. Scaled Agile Framework® (SAFe) certified individuals are known worldwide for their capability to support the successful transformation of organizations into Lean-Agile enterprise. The marketplace demands agile skilled professionals who can assist Agile teams and programs, establish a DevOps culture and give solutions. Candidates in the training gain insights into mastering Business Agility to succeed in the marketplace. They discuss how to build a team and technical agility. They study and follow the skills for supporting and executing PI Planning events and coordinating multiple Agile Release Trains (ARTs). They also explore the value of using a customer-centric mindset and design thinking approach to agile product delivery.

SAFe POPM

SAFe Product Owner / Product Manager (SAFe POPM):
SAFe® 5 Product Owner/Product Manager (POPM) is a program that helps you develop the skill sets needed to guide the delivery of value in a Lean enterprise. SAFe® POPM virtual training certification program is ideal for you if you want to work with customers to identify and prioritize the organizational requirements. As a SAFe® professional, you will be required to apply Lean-Agile mindset and SAFe® principles and practices in the organization, identify the customer needs, write epics, capabilities, features and stories, and prioritize work to deliver value to the organization.

SAFe Scrum Master (SSM):

SAFe® Scrum Master virtual training certification program is ideal for you want to gain an understanding of the role of a Scrum Master at enterprise level. As a SAFe® professional, you will be required to focus on the fundamentals of team-level Scrum. You will explore the role of the Scrum Master and know how to plan and execute the Program Increment (PI). You will also learn the key components of Agile at scale development, how Scrum is facilitated throughout the organization, and how to execute Iteration Planning. This SAFe® Scrum Master online training will also help you in understanding how to coach Agile teams to deliver the maximum business value at scale.

Lean Portfolio Management :

SAFe Lean Portfolio Management is applying lean thinking to managing enterprise, program and product portfolios to provide a fast and flexible flow of high-value work. Lean Portfolio Management (LPM) approach, you can collaborate across silos, empower teams, and organize around value to adapt to what customers want, faster.

The Lean Portfolio Management course helps executives, project management officers (PMOs) Lean Portfolio Management course helps executives, project management officers (PMOs) and other key stakeholders plan dynamically and be flexible enough to adjust initiatives and budgets as the market changes. The LPM course also provides the guidance and tools attendees need to work effectively in remote environments with distributed teams.

SAFe Advance Scrum Master:

SAFe® Advanced Scrum Master virtual training certification program is ideal for those scrum who wants to develop the expertise to facilitate cross-team interactions in support of program execution and persistent improvement in a Lean enterprise. Leverage scalable engineering, DevOps and Kanban to facilitate the flow of value, and drive collaboration with architects, product management, and other critical stakeholders in the larger program and enterprise contexts

SAFe Agile Product Manager:

In the SAFe Agile Product Management course, you'll explore how to use design thinking to put your customers at the center and create products that are desirable, feasible, and sustainable. You'll discover how continuous exploration fuels innovation. You'll get the guidance and tools you need to work effectively in remote environments with distributed teams. And you'll explore how to define a vision, strategy, and roadmap to satisfy existing customers and attract new ones.

Certified Scrum Master® (CSM):

Certified Scrum Master® is the number one choice among Scrum Certifications globally. CSM® training prepares you for the critical role of Scrum Master in a Scrum team by teaching you about the Scrum framework, principles, and values. Being a Certified Scrum Master, you will be able to guide your team through Scrum's accountabilities, events, and artifacts. The Certified ScrumMaster® (CSM®) training also gives you the confidence to successfully apply the Scrum framework in workplaces by which you can steer any project in the right direction.

Certified Scrum Product Owner (CSPO®):

The Certified Scrum Product Owner program focuses on the Product Owner role where you learn how to maximize business value, how to effectively do Product Backlog optimization and how to do the best possible job to satisfy key stakeholders. The CSPO Live course also helps you understand the role of a Product Owner (PO) by going through features, rights, duties, how to become a great Product Owner (PO), and so on. Being a Certified Scrum Product Owner, you will be responsible to create the product vision, order the Product Backlog, and make sure the best possible job is done to delight the customer.

Advanced Certified Scrum Product Owner:

A-CSPO® (Advanced Certified Scrum Product Owner) certification training is designed for Certified Scrum Product Owner (CSPO®) who wish to take their Scrum Product Owner skills to the next level.
